

3.2.2 Threaded Overlock Machine (4 yarn)

It has two needles and two grabber. Provides durable, flexible seams. Used for edge cleaning and combining of knitting and weaving. It makes 3-thread overlock stitching when only one needle is used.

Figure 3.2.2 4 Threaded Overlock Machine

In the 4-thread overlock machine, safety and edge cleaning stitching are done together. The 4 thread winding stitches have a safety stitch. Stitch width and stitch frequency settings are made according to fabric, model feature and desired quality standard.
