

### 4.5. Upholstery workshop

In our country , there are small, middle and big sized enterprises which work in upholstery field. Businesses which have different understanding of producement and bussiness capacity is different from each other. When small sized enterprises prosecute with a compressor, in middle sized enterprises , the number of machines increases to manufactory capacity. Big sized enterprises also regulate park of machines and producement workshops according to understanding of manufactory.

#### **➤ Types**

In the furniture upholstery sector have different size of upholstery workshop. When small sized workshops have one working area, there are different parts in middle and big sized workshops. These are the parts of cloth cutting, sewing, rubber cutting and montage.

#### **➤ Small sized workshops**

Small sized workshops are the workshops that have compressor and sewing machine . two labouring and 150 m<sup>2</sup> limited.

These workshops are generally used in upholstery of chair , sofa , door and board. Small sized upholstery workshops consist most of enterprises worked in this field consists

#### **➤ Middle sized workshops**

They are generally workshops that is available all types of upholstery , having area over 200 m<sup>2</sup> capacity ,more than two laboring and different equipment.

#### **➤ Big sized workshops**

They are the workshops that have serial producement ability, big working capacity and too much more laboring in the style of factory. These type of enterprises are less because of high cost of investment and requiring high expenditure .
