

3.1.6.1 Characteristics of Sewing Thread

The following table shows which factors affect each quality feature of sewing. The stitch strength was determined by the transverse strength of the seam and the longitudinal flexibility of the seam.

Visible and felt sewing qualities:

- nongather feeding
- Stunning ornament sews (colorful and shiny),
- Non-irritating sews,

Functional sewing qualities:

- In Transverse strength of stitches,
- In Longitudinal flexibility of stitches,
- Friction resistance of seam,
- Color specificity of sewing,
- Same permanence of day and night color,
- Non-shrinking of the stitch line,
- Cleaning resistance,
