

3.1.6.5 Sewing Thread Selection According to Surface Feature

The type, thickness of the fabric and the number of layers should be considered. At the same time, the needle thickness also affects the choice of yarn.

Thick, woolen woven fabrics, fine woven fabrics, knitwear, knitted fabrics are the most preferred kumaş coated twisted yarns yün. These yarns, called Corespun, can be coated on polyester or polyester or polyester polyester. Only cotton and polyester yarns are also the sewing threads used in these types of fabrics.

By selecting the yarn according to the thickness of the fabric, the needle-yarn thickness should be compatible with each other.
