| <div style="text-align: center;">  </div> <ul style="list-style-type: none"> <li>➤ Tighten the presser foot screw a little by placing the selected foot on the foot shaft.</li> </ul> | <ul style="list-style-type: none"> <li>➤ Tighten the foot of the presser using a screwdriver.</li> </ul>    |
| <div style="text-align: center;">  </div> <ul style="list-style-type: none"> <li>➤ Lower the presser shaft down by lowering the presser foot on the machine head.</li> </ul>         |                                                                                                             |

➤ Tighten the presser screw firmly.

➤ Lightly press the footswitch of the machine and turn the small wheel of the machine towards you by hand. Check that the presser foot is attached to the machine.

➤ Observe whether the machine needle hits the presser foot.
