

1.5.1.3 Hand and Arm Protection

Hands, arms has a significant share in job injury accidents. Gloves; hand, any part of the hand, and personal protective equipment to protect against the danger of a portion of the arm and forearm (Photo 1.2).

Will be used to identify hazards against which the uniform gloves gloves can not be used against all dangers is important.

Gloves to be considered during the selection and use some spots are:

- Gloves should be worn clean discussed.
- Hand in glove appropriate criteria should be used.
- Glove selecting grip, dexterity, precision, as well as features such as the hands or skin irritation should be noted.
- Difficulty of use should be provided not hand gloves to avoid sweat.
- holes in the gloves prior to each use, wear and tear must be checked.
- Gloves should be renewed at regular intervals.
